[www.gamesd.app](http://www.gamesd.app)

## **MISSION.**

*Our Mission is to Create and offer comprehensive Decentralized Gaming Platform that runs on a blockchain network allowing in game cryptocurrency transactions.*

## **VISION.**

*To achieve quality and excellence of service by offering the best gaming solutions that can succeed commercially with a global audience.*

## **THE TEAM.**

- ▶ *At Gamesdapp, we operate in a proactive, timely, and rapid manner, guaranteeing effective and efficient Game development solutions for our customers.*
- ▶ *We firmly believe that participation, teamwork and transparency are the values that lets people grow as a team.*
- ▶ *The company favours and promotes professional and staff diversity and innovation to assure maximum results.*
- ▶ *The whole team is always ready and responsible to act with determination, passion and energy to grow the company, both internally as well as externally.*

## **OUR GOALS.**

*Our main goal is to provide a community driven Gaming platform that makes constant changes and iterations based on clients requirements and to create a fair and trusted environment for both stakeholder and gamers.*

# **BLOCKCHAIN FOR GAMING.**

*One of the main problems in the Online Gaming industry is the lack of transparency that results in users distrust on traditional applications and online games.*

*Blockchain acts as a rescue for such problem and provides complete transparency, secure storage of user funds and non custodial gambling. This explains the growing influence of gaming DApps.*

## **DAPP GAME DEVELOPMENT**

*The DApp development uses the main advantages of the blockchain technology that is, reliability, transparency and data immutability. DAPP consists of a backend code running on a decentralized P2P network.*

*The evolution of blockchain technology and other digital assets has changed the way the world today now manages and carryout transactions. The transparency and reliability of blockchain technology helps creating a unique experience for players in the online gaming space.*
