AI Integration in Gaming

01 **Rocket Racing (Racing Game)**
AI-powered non-playable characters that adapt, learn, and respond dynamically to player actions.

02 **Procedural Content Generation**
AI-driven level design and environment generation for unique, replayable experiences.

03 **Player Analytics & Personalization**
Real-time player behavior tracking for tailored in-game rewards, difficulty adjustments, and recommendations.

04 **AI Game Bots**
Develop intelligent bots for training, challenges, or auto-play modes using advanced algorithms.

05 **Fraud Detection & Moderation**
AI-based systems to detect unusual player behavior, prevent cheating, and maintain fair gameplay.

06 **Voice, Chat & Emotion Recognition**
Integrate AI for voice-controlled commands, in-game chat moderation, and player emotion analysis for deeper immersion.
